Access

15 minutes' walk from JR Itano Station (Kotoku Line)
30 minutes' drive from JR Tokushima Station

Our college aims to cultivate world-class mechanics to take central roles in the future of Japan, one of the leading countries in automobile industry.

- 60% reduction of tuition fees
- TCOT scholarship program
- Free lend of bicycles, electric appliances, etc.
- Housing and job information by TCOT

Tokushima College of Technology was originally established as Tokushima Technical School in 1943. In 1973 the college was approved as the only automobile college to obtain Class 2 Automobile Mechanic License in Shikoku by both the Ministry of Education, Culture, Sports, Science and Technology and the Ministry of Land, Infrastructure, Transport and Tourism. Since then, as one of the few colleges specializing in automobile mechanics in Japan, TCOT has produced outstanding human resources to contribute to the development of automobile industry.

Expert knowledge with balanced general education subjects and computer exercises

As one of our central features, TCOT has an academic education curriculum with balanced general education subjects as well as expert knowledge and skills about automobiles. Among the general education subjects are ethics, mathematics, physics, and internet-based computer exercises. The college offers a two-year special Japanese language education program to international students. We also offer a special education program to students who want to transfer to another university as third-year students. Our students have transferred to universities such as Tokushima University, Osaka Sangyo University, Takamatsu University, Aichi University of Technology, etc.

Learning of the latest mechanism through highly attractive specialized practices

In our specialized practices, as educational materials we use new cars in the latest model by **TOYOTA, NISSAN, HONDA, MAZDA, MITSUBISHI, SUZUKI**, etc. to learn the world-class and latest mechanism of Japanese automobiles. We have a lot more to offer to car enthusiasts. For example, you can feel the speed of a car running 200 kilometers per hour on a chassis dynamometer, make a failure diagnosis of an electronically controlled automatic transmission, and maintain and repair cars with the latest technology such as a hybrid car and an electric car (EV). Our college has bought the fuel cell car (MIRAI).

From UNIV. Our unique Japanese language education

- After you decide to apply to our college and until the entrance examination:
a private lesson on Skype (one hour per week)
- After you are accepted and until the entrance ceremony:
a two-week special training on campus to improve your Japanese language skills and learn technical terms for cars
- After you enter our college and until the graduation ceremony:
a two-year Japanese language course for Japanese Language Proficiency Test (JLPT) N2 or higher

Our unique support system on and off campus

When you have a problem in your life or study, our graduate students living in the prefecture, as well as current Japanese students, will support you.

Courses · Enrollment limit

- Department of Automotive Engineering (two years) ... 80 students
- Advanced courses
 - Automotive Body Engineering major (one year) ... 20 students
 - Automotive Engineering major (two years) ... 5 students

Toyota MIRAI the fuel cell car

Running Test Apparatus capable of measuring speeds up to 200 kilometers per hour (BMW)

Maintenance of an electric car (NISSAN LEAF)

Tuition fee reduction It needs exemption conditions.

Title	Eligible year	Period	Reduction rate	Eligible students
Tuition fee reduction	Freshman and Sophomore	Two years	60%	All students

Scholarship program It needs support conditions.

TCOT will provide international students in the Department of Automotive Engineering with a scholarship: 20,000 JPY every month (except August and March)

Dormitory and Housing

We have dormitories affiliated with TCOT and provide information on private apartments with a reasonable price of 20,000 JPY to 30,000 JPY per month.

Mr PHAN VAN TUYEN
(Corporation) YANASE
Birthplace: Vietnam

I am very lucky to get help from my teacher lecturers. I learned a lot of professional knowledge and technology about car. And I passed the examination of National Second Level Automobile Maintenance Engineer. Now I work in the most famous company who repairs and sales German cars like Benz and so on in Japan. I have a quiet life with my wife and children.

Reception party

Tokushima: Gateway to the island of Shikoku

Tokushima is easily accessed from the Kansai area via Akashi Kaikyo Bridge, the longest suspension bridge in the world (Total length 3,910 meters; Longest span 1,990 meters). It takes about two and half hours from Kansai International Airport by Highway Bus.
